## What is hair mousse?

Mousse is a French word that means “foam”. A mousse is much lighter than a cream or a gel, and is ideal for less naturally voluminous strands because it can add 2-3 times as much volume to curls. It also helps make curls bouncier without the weight of a gel. Hair mousse also helps define curls without the crunch of a gel, if you apply it correctly on wet hair.

Mousse has several beneficial properties and provides hold, lift, and bounce. Mousse is easy to use and quite versatile. It can give unruly curls some control and keep frizz in check.

Thinner, softer waves and curls benefit the most from a mousse, to prevent the hair from falling flat and creating volume.

Mousse can be used for all hair types, and has a soft, airy texture. Because mousse can be a tad drying, be sure to determine whether your hair needs more moisture before reaching for the mousse. Your hair will typically dry faster with mousse than with gel.

## How is a mousse used?

Mousse can be used as both a styler and refresher. Because it does not have as strong a hold as a gel, you may need to touch up curls after washday and beyond with more mousse. For moisturized curls, you could use a mousse that provides moisture and a light hold, or pair a mousse with a light gel for longer hold. One popular technique is the mousse-gel-mousse method of application on clean wet hair.

This **Top 90 Mousses for Curly and Wavy Hair Guide** contains products currently on the market for natural hair. For each product, we have indicated if it contains protein, aloe, or coconut. We have also indicated whether it is better for low density (thin) or high density (thick) hair. In addition, look for the icon to indicate a mousse is CG safe.

Manufacturers often change ingredients in formulas so be sure to double-check the ingredient list before buying.

## How To Use This Guide

There is a lot of information in the guide - don't get overwhelmed. We have done the work for you. All you need to do is:

1 - Take our Hair Quiz.

2 - Read the short introduction in the guide.

3 - Review the icons at the top of the guide.

4 - Check the icons underneath each product.

5 - Match the icons with those at the top of the guide.

6 - Select those products that match your hair characteristics.

For example, if your hair is thin or thinning (low density) look for products that are marked for low density hair.

7 - If you are allergic to certain ingredients, such as aloe or coconut, avoid products with those icons.

8 - If your hair is limp or damaged, pick products with the protein icon.
